AWARE

PLATFORM EMPOWERING GLOBAL SITUATIONAL AWARENESS AND THREAT MANAGEMENT

Axient sets the standard for enterprise-wide situational awareness and command capabilities with AWARE, our flagship common operating picture platform. AWARE is built using mature technology and software developed by the Department of Defense (DoD) and trusted by over 40,000 DoD, DHS, military users, 32,000 non-federal users, and 100 commercial licensees worldwide.
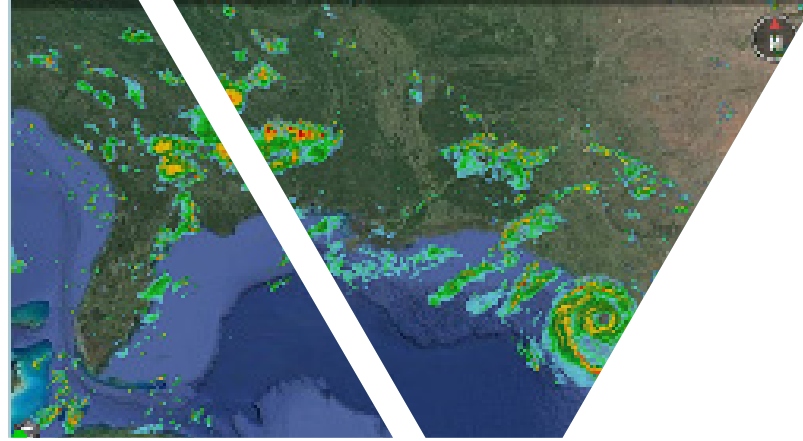

Key Features

- Comprehensive Situational Awareness: AWARE provides both localized and enterprise-wide situational awareness across diverse sectors including security, asset monitoring, military and space operations, law enforcement, and disaster response. It seamlessly integrates data from sensors, satellites, drones, and other systems to create a unified operational picture.
- Open Standard and Interoperability: Designed with an open architecture, AWARE ensures interoperability with any communication interface and data source. This flexibility allows for seamless integration into existing infrastructures, facilitating efficient data sharing and collaboration.
- Deployment Flexibility: Available on server-based platforms for enterprise-wide applications, AWARE is also accessible on mobile devices such as phones, tablets, and handhelds. This versatility ensures critical information is available anytime and anywhere, enhancing operational responsiveness.
- Multi-Layered Defense Platform: AWARE features a secure and scalable multi-layered defense platform that adapts to evolving threats. By utilizing AI-based algorithms and a variety of sensor types, it significantly reduces the risk of false positives and optimizes sensor placement for enhanced threat detection accuracy.
- Training and Preparedness: AWARE enables simulation of threat scenarios, allowing personnel to train effectively for rapid response to real-world threats. It serves as a comprehensive tool for threat detection, identification, analysis, and response management, streamlining operations into a cohesive, efficient process.

Benefits & Outcomes

- Enhanced Operational Efficiency: By providing a single pane view of threats across global enterprises, AWARE facilitates informed decision-making and streamlined operations.
- Cost Efficiency: Optimized sensor selection and placement reduce costs while improving the accuracy of threat detection, maximizing ROI and operational effectiveness.
- Future-Proof Technology: Built on military best practices and tools, AWARE ensures your investment is protected against future threats and technological advancements, providing long-term security and reliability.
- Proven Expertise: Axient brings unparalleled expertise to every deployment, with a track record of deploying over 300 Counter-Unmanned Aircraft Systems (CUAS) globally, training more than 16,000 personnel across various military branches and coalition partners and participating in numerous major test events.

Axient's AWARE empowers organizations with advanced capabilities to monitor, analyze, and respond to threats effectively. Whether securing critical infrastructure or monitoring vital, high-priority assets, AWARE stands ready as the comprehensive solution for modern situational awareness and threat management challenges.
